

Online Database Training@Library

A series of online database training had been organized by UMP library annually at both campuses recently. The objective is to educate user about the database platform. This online database training covered searching technique, what's new about the platform, coverage subscription, publishing requirement. This training is free to all user. It was conducted by the database vendor trainer. The scheduled for previous online database training as below:

1. Scopus and Science Direct by Elsevier – 27 September 2017
2. Web of Science, JCR, Endnote by Clarivate Analytics – 3 & 4 October 2017
3. Taylor and Francis Online by Taylor & Francis Group -11 October 2017

Opening speech by Prof. Dr. Jose Rajan - Dean of Research (Technology)

The participants were among postgraduate student and academician. The training was conducted at library computer lab both campuses due to hands on approach for each session. Participant would have exposure on how to use the subscribed resources and be able to interact with the vendor trainer directly. Most of the participants were satisfied and happy with all the training session.
