PERPUSTAKAAN

## Childhood life....

- Interest

- Any outdoor activities (football, badminton, sepak takraw, table tennis, tennis, traditional games, mandi sungai, lastik burung, makan buah atas pokok etc)
- Seni and budaya (singing, dancing)
- Others – lepak with friends until late night, cycling everywhere.
- Study.....ops sorry, that is not me

- How was my study?

- Primary school – never study, lazy to read and write, always playful. But always in class A. Somehow, I have no problem with mathematics. That is why my Penilaian result (standard 5 examination) I got (1A and 4B)
- Best friend – Lee Wong Hwa, buddy mandi sungai and lender to copy his homework.
- One more secret – until now, I have never finish reading a story book or a novel etc. Except for Thesis (because there is no choice).
